We spend an average of two years of our lives in the bathroom. Don't let it become a place of passage, dull and lifeless. Although it is true that bathrooms are the most functional room in the house, this does not necessarily mean that they have to become a cold place, without style.

Personalising interiors means adapting a person's lifestyle and way of interacting with others and their tastes and needs to the different elements that make up their home. From the distribution of space to the choice of materials or the colours of the walls, floors and furniture; everything can be personalised. Interior design can be a clear reflection of our identity and, at the same time, it can evoke countless emotions.

For all these reasons, Krion Porcelanosa Bath has developed a whole range of bathroom elements in different formats, textures and colours that can be combined with each other and turn the bathroom into a space that is fully customised to your needs.

Krion® Solid is mainly composed of high purity white mineral (ATH). This gives the material hardness and resistance, and a unique feel.

100% recyclable

Easy to clean

Highly resistant to chemical attack

Single piece

Ultra-White

Anti-bacterial

Compact mineral

KRION® SOLID

Natural style, a pleasant touch and resistance are among its main characteristics

The Krion® Solid bathroom series are made entirely with the Krion® Solid surface, which makes it possible to achieve monolithic pieces ranging from straight and symmetrical designs to curved and oval designs, while maintaining a uniform style that offers excellent visual continuity.

Thanks to the pure white of Krion® Solid, bathrooms with a natural style and a pleasant texture can be achieved, as well as numerous technical benefits, such as resistance. Each series has its own distinct character, but always has design and exclusivity at its core.

Smart

Its oval design adds a touch of personality to your bathroom

Smart worktop made of Krion® Solid and wooden wall unit in different finishes.

The oval inset washbasin unit, consisting of one or two basins, has an integrated overflow. It can be installed independently or accompanied by a wall-mounted unit with large, single or double pull-out drawers, and finishes in Taupe Oak, Ash Oak, Deep Blue, White and Beige wood.

The Smart series also includes as an option a metal chassis with shelf in lacquered wood or metal.It is designed to be installed quickly, and its maintenance is easy and straightforward; all this, without foregoing aesthetics and functionality.

Nest

Its asymmetrical shapes allow water to flow naturally

Nest features softly rounded lines, inspired by asymmetrical shapes with an exquisite presentation, where the design flows smoothly and naturally, just like water.

This meticulous design with no corners makes maintenance and cleaning quick and easy, increasing its durability. It has a practically imperceptible perimeter ridge that promotes hygiene and prevents splashing.

The series consists of several elements and materials that are combined to offer a wide range of options: worktops, cabinets, metal chassis and accessories, with Krion® Solid finishes on the worktops and lacquered in White or Black on the remaining elements. Available in sizes 61 x 50, 80 x 50, 120 x 50 and 152 x 50 cm.

The Nest worktop does not require a chassis for assembly, making it very easy to install, and the sink has an integrated high-capacity overflow for quick emptying of water.

Ras

Its design provides the worktop with a high degree of functionality

RAS WORKTOP
Worktop made of Krion® Solid

Size
110 x 54 x 12 cm

SAP
100153761

Ras consists of worktops and washbasins made in Krion® Solid, with concealed drain and trim in the same material. The series is completed with a wide range of auxiliary units in different finishes: Natural Walnut, Black Lacquer, Beige Lacquer and White Lacquer.

The combination of these elements gives the Ras series a high degree of functionality and personalisation potential, with a refined style.

Krion Shell

Krion Shell® is an Engineered Mineral Composite developed by Krion Porcelanosa Group, comprising two parts: a structural body consisting mainly of minerals (dolomites) bonded with Eco Resin, and a solid and homogeneous outer layer also consisting of mineral (ATH) and resin.Most of the base body of Krion Shell® consists of minerals that are abundant in the earth (dolomite).

An Eco Resin made from plastic waste is used to bind the minerals together. By using recycled PET, waste is given a new life, minimising the consumption of the earth's resources.

Uses at least 5% of plastic waste in its overall composition

SCS Global Service, a leading independent North American environmental certification body, verifies and guarantees that all certified Krion Shell® products contain a minimum of 5% of plastic waste in their overall composition, thus ensuaro a more sustainable and environmentally friendly production.

One

Functional design that simplifies cleaning and prevents splashing

One, made up of various worktops and washbasins, stands out for its straight lines and the predominance of square shapes throughout its structure.

Its minimalist design is enhanced by the possibility of adding a black metal structure to the worktops, or a unit in Vulcano Grey or White, which stands out for its large soft-close drawer and its large metal handle.

Made with Krion Shell® technology, the One series has a practically imperceptible perimeter ridge that promotes hygiene and prevents splashing, simplifying cleaning and maintenance.

Spirit

Ethereal design, able to withstand any pace of life

Spirit, worktop with built-in washbasin with a minimalist look, made with Krion Shell® technology that guarantees excellent quality and durability. Krion presents a range of worktops available in: 61, 80, 100, 110, 120 and 150 cm, with a thickness of just 15 millimetres. All these formats are available in White and in Gloss and Matt finishes.

In addition, this series is compatible with units from the Smart, One and Wave series. The Spirit series has a floor structure available in matt black. It incorporates a lower shelf lacquered in White to increase the storage capacity of the bathroom.

Natural Top

The first Krion Shell® worktop with an embossed texture

NATURAL TOP WORKTOP
Krion Shell® worktop with graphite finish and rock texture

Size
80 x 50 x 3 cm

SAP
100298378

This new Krion Shell® worktop is presented in its lightest format. With a thickness of just 3 cm, it offers great resistance to daily use, maintaining a balance between functionality and aesthetics with its rock-like texture. It*s* *l*ight appearance enhances the visual impact in small to medium sized bathrooms.

Natural

Worktop with 12 cm functional panel and *rock* texture

NATURAL WORKTOP
Krion Shell® worktop with white finish and rock texture

Size
80 x 50 x 12 cm

SAP
100298435

With a thickness of 12 cm, this Natural worktop model offers 2 options: a continuous panel that maintains the uniformity of the rock texture throughout its front, or the installation of a towel rack by opening a hole in the panel, providing extra space in the bathroom.
